

EXTREME FOLDING TRANSPORT

BY

RESCUE TRAILER

DESIGNED FOR
MILITARY, RESCUE, LAW ENFORCEMENT, CIVIL

TECHNICAL SPECIFICATION

Ready to GO:

Dimensions: 2,25 x 4,9 x 2,8m [W x L x H]
Total length including drawbar: 6,3 m
Height of the inner part: 1,85 m
Homologation to: 3,5 t
Total vehicle mass: 9 t

Ready to transport:

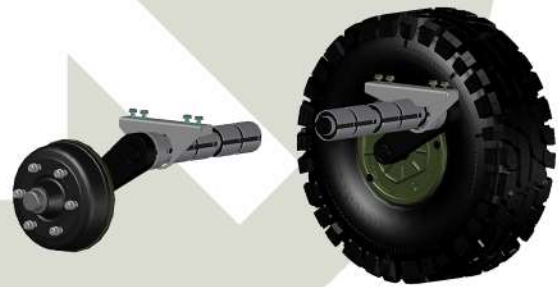

Dimensions: 2,25 x 2,1 x 2,8 m [W x L x H]
Pieces per truck trailer: 8x
Fits the dimensions: NATO pallet 463L
Can also be towed in folded state

COMFORTABLE IN OFFROAD - AXLE LIFT 20 cm

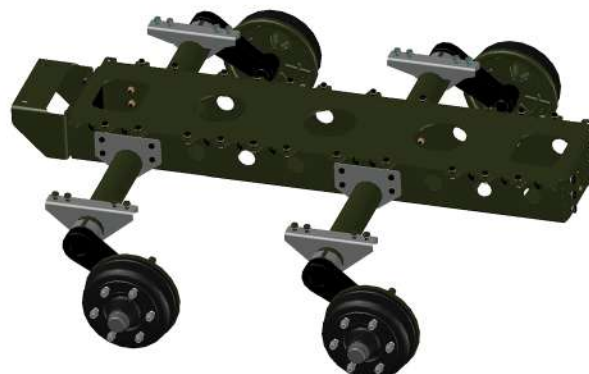

Suspension mounted in the axle

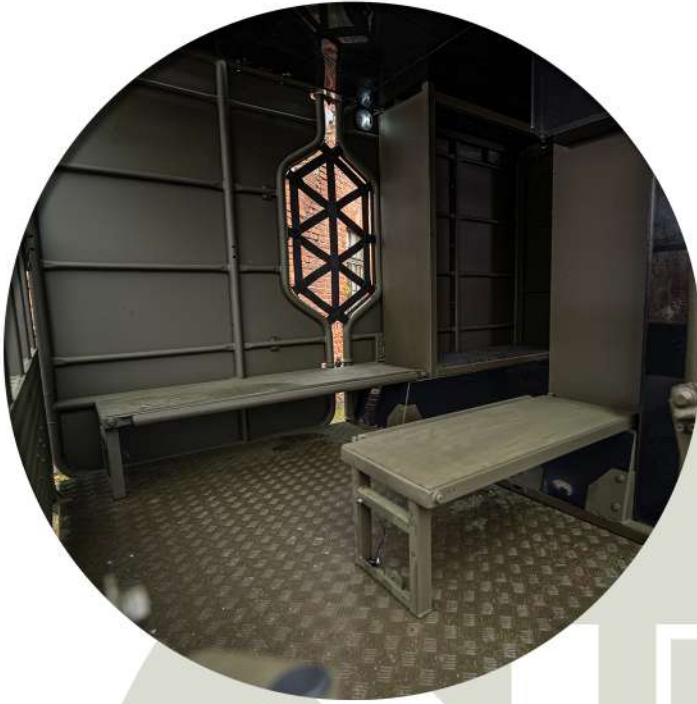

Drum brakes / off-road tyres 33"

Supporting frame

MAIN FEATURES

Capacity:

Total seats: 16 persons
- central part: 6 persons
- folding benches: 10 persons
or
Standing places: 30 persons
Ceiling loading area: 10m²

EASY TO OPERATE ALL PARTS

Folding benches
Sitting / standing

Tipping ramp
Easier LOAD IN / OUT

Trailer hitch
Towing another trailer

Adjustable drawbar
For cars and trucks

Ballistic protection
For the whole trailer

Cabinet for equipment
And built-in lighting

Water tank
Or other liquid

Control panel
Sockets 230V and 12V

Fire extinguishers
Or oxygen cylinders

Built-in crane
Lifting loads on the roof

ADDED VALUE

USE

Evacuation of persons
Displacement and logistic security
Transport of material and equipment

POLYFUNCTIONAL

PRICE

Lower purchase price than competing solutions (bus, truck)
Trailer transport and storage - takes up less space when folded
Efficient transport of people and materials at low cost

LOW COST/ HIGH EFFICIENCY

LOGISTICS

Easy handling - on its own chassis
Possibility of towing another trailer - aggregate, fuel, water tank...
Towing behind the car and truck - adjustable drawbar developed for the military

8 PIECES PER TRUCK TRAILER

SERVICE

Quick preparation for operational status
Easy to operate without special skills
Easy repairability - weldable steel frame and interchangeable parts

2 hod READY TO USE

DRIVABILITY

Good ground clearance - high ground clearance and large off-road tyres
Stable - independent wheel suspension
Durable - robust construction, covered shock absorbers

20 cm AXLE LIFT

INDIVIDUAL DESIGN

Equipment according to the specific needs of the client
Open / closed body
EFT chassis with special superstructure

AT YOUR REQUEST

UNIQUE SOLUTION

Self-sufficiency - own power supply
Simplicity of construction
Robust solution

LIFETIME MOBILITY

POSSIBILITY OF BALLISTIC PROTECTION - ARMORED BODY & CHASS

RESCUE TRAILER - MODEL EFT - EXTREME FOLDING TRANSPORT

LOGISTICAL SUPPORT

AREA OF APPLICATION:

- War conflict
- Rescue forces support

NEED:

- Moving large numbers of people to and from a post
- Movement of wounded persons to the treatment site
- Unit facilities - mobile unit
- Availability of supplies - first aid kits, water, food, equipment

ADVANTAGES OF THE EFT RESCUE TRAILER

Significantly cheaper than other transport methods - large number of EFTs available

Cheap and fast transport of EFT trailers to their destination - in folded state by air or on a trailer

When folded, many pieces can be prepared in a small storage space

No special accessories are needed for handling - it has its own chassis with the possibility of driving even when folded

EFT can be hitched to cars and trucks in the affected area - interchangeable drawbar

Various first aid kits can be included - oxygen cylinders, defibrillator, infusions

Provides sufficient comfort for injured persons - stable thanks to sophisticated chassis

Durable in difficult conditions - not bothered by water, heat or rough terrain

Safe transport of people - thanks to the perimeter construction

Possibility of ballistic protection

In the event of an emergency, the EFT can be operated by untrained personnel or civilians.

EVACUATION OF THE CIVILIAN POPULATION

Threats:war

Terrorist attack, pandemic, war conflict

Needs:

- Evacuate the population to a safe zone as quickly as possible.
- Provide first aid
- Transportation of property and equipment
- Transportation of professional and volunteer forces between the different impact centres
- Transportation of food, drinking water and basic medical supplies materials, including attendants
 - Possibility of hauling generators and bulky tanks with potable water
 - Establishment of several mobile "primary health care units"

Commonly used means of transport:
Buses, trucks, helicopters

ADVANTAGES OF THE EFT RESCUE TRAILER

Significantly cheaper than other transport methods - large number of EFTs available
