

HEAVY LIFTING CYLINDERS FOR SAFE VEHICLE SERVICE AND MAINTENANCE

Safe lifting system for vehicle maintenance and service solutions, where our split flow pump revolutionize heavy machine service and maintenance.

Our innovative approach is designed to ensure safety, efficiency, and reliability in handling heavy military equipment.

With our cutting-edge technology and user-centric design, we ensure easy and swift maintenance on any tracked Infantry Fighting Vehicle lifter with the highest standards of precision and safety.

The system has been developed in cooperation with the Danish Army (DALO) for the Infantry Fighting Vehicle.

BENEFITS

- Easy to install, operate and store.
- Solution of 4 cylinders and a control unit
- Controlled pushing force up to 20 tons per cylinder and combined up to 80 tons
- Split-flow precision within 3%.
- Insertion of safety spacers secured with pins.
- High-grade materials for durability.
